Prof. Sham Tickoo Purdue Univ., CAD/CIM Technologies : NX 8 for Designers before purchasing it in order to gauge whether or not it would be worth my time, and all praised NX 8 for Designers:

1 of 1 people found the following review helpful. bestBy nicothis is the best learning tool i have had in years, easy and to the point very pleased with my book, again thanks to the authorNX 8 for Designers1 of 1 people found the following review helpful. Great bookBy P CzyzewskiVery nice book . I have used it at work in my class. The teacher even used it in class too. Thank you.0 of 0 people found the following review helpful. Hard to find. Very complete.By Robert W. SareHard to find . Very complete.

NX 8 for Designers is a comprehensive textbook that introduces the users to feature based 3D parametric solid modeling using the NX 8 software. The textbook covers all major environments of NX with a thorough explanation of all tools, options, and their applications to create real-world products. In this textbook, about 60 mechanical engineering industry examples are used as tutorials and an additional 35 as exercises to ensure that the users can relate their knowledge and understand the design techniques used in the industry to design a product. After reading the textbook, the user will be able to create parts, assemblies, drawing views with bill of materials, and learn the editing techniques that are essential to make a successful design. Also, in this book, the author emphasizes on the solid modeling techniques that improve the productivity and efficiency of the user. Salient Features of the Textbook Consists of 14 pedagogically sequenced chapters covering the Sketching, Modeling, Assembly, Synchronous Modeling and Drafting environments of NX. The first page of every chapter summarizes the topics that will be covered in it. Real-world projects and examples focusing on industry experience. Step-by-step explanation of concepts to guide the user through the learning process. Additional information is provided throughout the book in the form of tips and notes. Self-Evaluation test and review questions are provided at the end of each chapter so that the users can assess their knowledge. Free Teaching and Learning Resources CAD/CIM Technologies provides the following Free Teaching and Learning Resources with this textbook: Technical support Part files of the models used in illustrations, tutorials, and exercises Customizable PowerPoint presentations for every chapter in this textbook Instructor guide that provides solutions to review questions and exercises

About the Author CAD/CIM Technologies, Prof. Sham Tickoo of Purdue University Calumet, and the team of dedicated contributing authors are committed to bring you the best textbooks and free teaching and learning resources on Computer Aided Design, Manufacturing and Engineering (CAD/CAM/CAE), Computer Programming and Applications, GIS, Civil, Animation, and related technologies. We strive to be the first and the best. That is our

promise and our goal. Our team of authors consists of highly qualified and experienced Professionals who have a strong academic and industrial background. They understand the needs of the students, the faculty, and the challenges the students face when they start working in industry. All our textbooks have been structured in a way that facilitates teaching and learning, and also exposes students to real-world applications. The textbooks, apart from providing comprehensive study material, are well appreciated for the simplicity of content, clarity of style, and the in-depth coverage of the subject.
